DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Surig (4,851,954).

Surig (Figs.1-2) disclose a temperature monitoring circuit comprising a first, second and third voltage divider (10-11, 66-6 and 77-7), each of which comprises resistors having temperature-dependent resistances (col.3, lines 5-7), outputting a first, second and third voltage (voltage at nodes between 10-11, 66-6 and 77-7); and a voltage comparator (13-14) comparing the first voltage with the second voltage, and the first voltage with the third voltage and respectively outputting a first and second signal (output voltage signals of 13 and 14) according to the comparison results (col.3, lines 36-62).

Allowable Subject Matter

3. Claims 2-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2824

4. The following is a statement of reasons for the indication of allowable subject matter: Claim 2 recites a detail structure of a voltage comparator, which is not disclosed by the prior art. Claims 8 and 13 recite the use of the temperature detecting circuit in the refresh circuit of a memory device having a voltage detection circuit, a pulse selection circuit, an internal period selector, a plurality of timers and a self-refresh controller. The prior art fails to disclose or suggest the use of the particular temperature detecting circuit as claimed in claim 1 in the memory device as claimed in claims 8 and 13. Thus, claims 2-17 are allowable if they are rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Tanimoto (5,485,111) disclose a supply voltage detector having a voltage divider.
